Summary

Final-year Computer Science student with strong experience in backend development and building scalable web applications. Skilled in designing REST APIs, working with databases, and implementing efficient data structures using Java.

Education

KL University

B.Tech in Computer Science and Engineering

2022 – 2026

CGPA: 9.3

Narayana Junior College

2020 – 2022

MPC Stream

Marks: 956/1000

Montessori High School

2016 – 2020

CGPA: 10

Work Experience

NDMatrix

February 2026 – Present

SDE Intern

- Developing backend services and REST APIs with focus on scalability and performance.
- Optimizing database queries and improving system efficiency.
- Collaborating with teams to build and deploy production-ready features.

Wipro Ltd.

June 2025 – August 2025

Data Engineering Intern

- Built Python-based data pipelines for automation and large-scale processing.
- Developed dashboards using Databricks for analytics and reporting.

Projects

URL Shortener

React, Node.js, Express.js, MongoDB

- Developed a full-stack URL shortening service with authentication and analytics tracking.
- Implemented JWT-based authentication and modular backend architecture.
- Optimized database queries for efficient link redirection and analytics.

Word Search Tool

React.js, Express.js

- Built a responsive word search application integrated with dictionary APIs.
- Implemented caching and search history optimization for improved performance.

Real-Time Chat Application

React, Node.js, Socket.IO

- Developed a scalable real-time chat system with multi-room support.
- Designed event-driven architecture for low-latency communication.
- Implemented user session management and message handling modules.

Technical Skills

- **Languages:** JavaScript, Java, C
- **Frameworks:** React.js, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Cloud & Tools:** AWS (Lambda, EC2, S3), Databricks, Git, GitHub, Postman
