Summary

Final-year Computer Science student with strong experience in backend development and building scalable web applications. Skilled in designing REST APIs, working with databases, and implementing efficient data structures using Java.

Education

KL University

B.Tech in Computer Science and Engineering

Narayana Junior College

MPC Stream

Montessori High School

2022 – 2026

CGPA: 9.3

2020 – 2022

Marks: 956/1000

2016 – 2020

CGPA: 10

Work Experience

NDMatrix

SDE Intern

- Developing backend services and REST APIs with focus on scalability and performance.
- Collaborating with teams to build and deploy production-ready features.

Wipro Ltd.

Data Engineering Intern

- Built Python-based data pipelines for automation and large-scale processing.
- Developed dashboards using Databricks for analytics and reporting.

Projects

URL Shortener

- Developed a full-stack URL shortening service with authentication and analytics tracking.
- Implemented JWT-based authentication and modular backend architecture.
- Optimized database queries for efficient link redirection and analytics.

DocuMind AI – Multimodal RAG System

- Developed an AI-powered multimodal RAG platform enabling users to upload PDFs and text documents and query them using natural language.
- Implemented semantic search and contextual retrieval using vector embeddings with ChromaDB for efficient document understanding.
- Integrated LangChain pipelines with LLMs to generate accurate context-aware responses with conversational memory support.
- Designed scalable document ingestion and retrieval workflows supporting multi-document querying and real-time AI responses.

HRGPT Enterprise – HR RAG Management System (Ongoing)

- Currently developing an AI-powered HR management and retrieval system for processing employee records, HR policies, and organizational documents.
- Implementing intelligent employee information retrieval and HR policy Q&A using Retrieval-Augmented Generation (RAG).
- Building secure role-based access workflows and scalable backend APIs for efficient HR operations.
- Designing natural language querying capabilities to improve internal knowledge accessibility and HR assistance.

Technical Skills

- **Languages:** JavaScript, Java, C
- **Frameworks:** React.js, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Cloud & Tools:** AWS (Lambda, EC2, S3), Databricks, Git, GitHub, Postman
